AVEVA™ Communication Drivers—2023 R2 what's new

AVEVA Communication Drivers help integrate external data sources with operations control applications. The 2023 R2 versions continue AVEVA's commitment to industrial standards and open interoperability for device integration and IT/OT convergence.

What's new

- OPC UA Methods client

The OPC UA client in OI-Gateway adds support for OPC UA Methods, which facilitates function calls to objects in an OPC UA server. Methods are a core capability in the comprehensive OPC UA standard and are used for both simple actions and for exchanging complex payloads such as recipes or production orders.
